

ACCOMMODATIONS DESCRIPTION

Cascina Vereira

House-shelter, equipped with beds, tables, benches, an electric hob, a large refrigerator with an ice compartment, 2 fireplaces (which also heat the upper floors) and 2 bathrooms, making it ideal for groups of hikers who wish to stay overnight. The enchanting plain of Vereira can be reached from the path that goes up the Gargassa river, from the path that goes around the Rocca dei Crovi passing through the Barcun dra Scignura (Lady's balcony), or with the path that starts from Rossiglione or Campoligure and passes through the Poggio di Campoligure. The house cannot be reached by public transport, but only on foot. It is immersed in the greenery of the plain that surrounds it, with meadows and fruit trees, at the confluence of two rivers full of water and with splendid lakes where you can cool off. The house has a ground floor with: living room with a stove, electric hob, refrigerator, sink and tables with benches, another room with table and benches, an entrance hall with a second fireplace and a bathroom. The first floor is composed not only of a second bathroom, but also of two rooms with 8 beds equipped with pillows and blankets. The house ends with an attic divided into two rooms. The equipment of the house is completed by dishes, glasses, pots, garbage cans. The structure is equipped with photovoltaic panels which make it autonomous and ecological from an electrical point of view.

Cascina Masciulla

It is the largest of the housing units and therefore very suitable for groups. Located in the middle of an immense meadow surrounded by woods and with a suggestive view of the Rocce Nere mountains. The ground floor consists of a fully equipped kitchen, equipped with a wood-burning oven and a brazier for cooking on the grill; a large living room with fireplace suitable for lunches, receptions, or to spend the evenings in front of the fire. On the first floor, both double and single bedrooms for a total of up to 7 beds, a large hallway, a bathroom with shower. The second floor is an attic that can be used by groups and can be equipped with both beds and sleeping bags. Outside, the structure is equipped with a large pergola, tables and benches for tastings, lunches or refreshments on the occasion of parties and ceremonies, an additional bathroom, an additional fire point for cooking or for evening campfires, a sink - double trough. Equipped with solar panels for hot water.

Cascina Monterosso

It is the reception center for guests. It has the same characteristics as Cascina Masciulla, except for the living room which in this house has been divided into two rooms, one for spending the evenings in front of the fireplace tasting products and drinks, and another room for having lunch. This house also has an external fire point for cooking on the grill or for evening campfires, and, in addition to a veranda equipped with tables and benches, it offers considerable open and/or shady spaces for enjoying lunches and refreshments outside in almost all seasons.

Chalet

It is a small house clad in wood, very well thermally insulated and it is an equipped mini-apartment. It consists of 3 rooms: a large living room with thermo-fireplace, kitchen, table and benches for lunch; a bedroom with double bed, sofa bed, equipped with a mezzanine that can contain up to 4 other sleeping places; a bathroom with shower equipped with hot water supplied by solar panels, in line with the choice of energy saving and eco-friendly development adopted by our company. Outside there is the possibility of cooking grilled meat and eating on outside tables and benches. This Chalet is located in such a way as to be completely independent, for a stay in the utmost discretion, surrounded by a chestnut wood, facing south, with a magnificent panorama over the entire Gargassa valley.

Baita

Placed in the center of a clearing called Belvedere, detached from the other units, it allows for a very "spartan" stay. In fact, it consists of a wooden house-refuge immersed in the woods, without a bathroom. It has the capacity to accommodate up to 8 people, but can accommodate even larger groups for overnight stays with a sleeping bag. Outside there is a fire point with the necessary to cook grilled meats, and a water point. On request, an economic gas cooker with cylinder, or lighting with field light or generator can be supplied. From this clearing you can enjoy a magnificent panorama of the Gran Canyon of Val Gargassa.
